

## **I. WHAT ARE WE CONCERNED WITH?**

**Descriptive lithology, mineralogy, petrology and geochemistry of kimberlites and closely related rocks and their constituent minerals - excluding xenoliths and xenocrysts.**

PHOTOMICROGRAPH OF KIMBERLITE FROM THE KIMBERLEY MINE  
(BIG HOLE), SOUTH AFRICA

# CONTENTS OF SECTION I

|                                                                                                                                                              | Page |
